EXERCISE 14

LOG ANALYSIS FOR DETECTION AND RESPONSE

Aim: To understand log analysis, implement best practices, and use essential tools for efficient threat detection and incident response.

The screenshot displays the 'Intro to Log Analysis' course page within the AttackBox environment. The page has a dark theme with a blue header bar. The title 'Intro to Log Analysis' is prominently displayed, followed by a subtitle: 'An intro to log analysis, best practices, and essential tools for effective detection and response.' Below this, it indicates the course is 'Easy' and takes '60 min'. A green button labeled 'Share your achievement!' is on the left, and a row of utility buttons including 'Start AttackBox', 'Badge', 'Help', 'Save Rooms', '378', and 'Options' is on the right. A progress bar at the bottom shows 'Rooms completed: 1 / 100%'. Below the header, a list of 10 tasks is shown, each with a green circle icon and a dropdown arrow. The tasks are: Task 1: Introduction, Task 2: Log Analysis Basics, Task 3: Investigation Theory, Task 4: Detection Engineering, Task 5: Automated vs. Manual Analysis, Task 6: Log Analysis Tools: Command Line, Task 7: Log Analysis Tools: Regular Expressions, Task 8: Log Analysis Tools: CyberChef, Task 9: Log Analysis Tools: Yara and Sigma, and Task 10: Conclusion.

Rooms completed: 1 / 100%

- Task 1 Introduction
- Task 2 Log Analysis Basics
- Task 3 Investigation Theory
- Task 4 Detection Engineering
- Task 5 Automated vs. Manual Analysis
- Task 6 Log Analysis Tools: Command Line
- Task 7 Log Analysis Tools: Regular Expressions
- Task 8 Log Analysis Tools: CyberChef
- Task 9 Log Analysis Tools: Yara and Sigma
- Task 10 Conclusion

Use `cat` on the `apache.log` file to return only the URLs. What is the flag that is returned in one of the unique entries?

✓ Correct Answer [Hint](#)

In the `apache.log` file, how many total HTTP 200 responses were logged?

✓ Correct Answer [Hint](#)

In the `apache.log` file, which IP address generated the most traffic?

✓ Correct Answer [Hint](#)

What is the complete timestamp of the entry where `193.122.85.76` accessed `/3agls.php`?

✓ Correct Answer [Hint](#)

Locate the "loganalysis.zip" file under `/root/.notes/IntroLoganalysis/tasks/` and extract the contents.

✓ Correct Answer

Upload the log file named "access.log" to CyberChef. Use regex to list all of the IP addresses. What is the full IP address beginning in 212?

✓ Correct Answer

Using the same log file from Question #2, a request was made that is encoded in base64. What is the decoded value?

✓ Correct Answer

Using CyberChef, decode the file named "encodedflag.txt" and use regex to extract by MAC address. What is the extracted value?

✓ Correct Answer

Answer the questions below

What languages does Sigma use?

✓ Correct Answer

What keyword is used to denote the "title" of a Sigma rule?

✓ Correct Answer

What keyword is used to denote the "name" of a rule in YARA?

✓ Correct Answer

Result: Gained insights into analyzing logs effectively, applying best practices, and leveraging tools to detect and respond to security events.
